Professional Summary

B.Tech Information Technology undergraduate focused on AI engineering, backend development, and business analytics. Hands-on experience building AI-powered applications, REST APIs, machine learning pipelines, automation workflows, and data-driven dashboards using Python, Flask, TensorFlow, LangChain, n8n, and related APIs.

Education

Bachelor of Technology, Information Technology — Panipat Institute of Engineering and Technology, Panipat, Haryana

2024 – 2028 (Expected)

Class XII, Senior Secondary — Board of School Education Haryana (BSEH), Haryana
2024

Class X, Secondary — Board of School Education Haryana (BSEH), Haryana
2022

Technical Skills

- **Programming Languages:** Python, C++, C, Java, SQL
- **Backend Development:** Flask, REST APIs, Webhooks, Node.js, HTTP and JSON APIs
- **Artificial Intelligence and Machine Learning:** TensorFlow, CNN, Transfer Learning, scikit-learn, LangChain, Prompt Engineering, RAG
- **Data Analysis and Computer Vision:** Pandas, NumPy, OpenCV, Matplotlib, Seaborn, EDA, Image Preprocessing
- **Automation and Tools:** n8n, Gmail API, Gemini API, Git, GitHub

Experience

AI Intern — My Job Grow in AI, Remote
2025

- Built LLM-based workflows using LangChain and Agno, working with prompt pipelines, tool-based workflows, and AI-driven automation.
- Developed n8n workflows integrating LLMs and external APIs to automate repetitive business processes.
- Worked with prompt engineering, RAG concepts, API integration, and agent-based workflows while developing practical AI applications.

Business Intelligence using AI Analytics Intern — Revolt Motors
July 2026 – August 2026

- Analyzed service and operational data to support business reporting, complaint monitoring, and retail performance analysis.
- Developed an interactive Open Complaint Dashboard with KPIs and filters for complaint status, aging, source, zone, ASM, dealer, month-wise trends, and complaint attributes.
- Worked on EOD Report Management and Analysis, structuring daily operational reports and extracting trends and exceptions for business review.
- Contributed to the AI Retail War Room, using analytics and AI-assisted analysis to organize retail data and support performance monitoring.

Selected Projects

Lifeline AI, Emergency Response Platform — 2025

Technologies: Python, Flask, Dash, REST APIs, Pandas, JavaScript, Leaflet

- Built and deployed an emergency response platform for ambulance tracking, hospital routing, proximity alerts, and real-time dashboard monitoring.
- Developed Flask REST endpoints for ambulance state, route information, notifications, health checks, and dashboard communication, with shared state management and server-sent events.
- Implemented distance-based ambulance and hospital calculations and real-time telemetry flows using GPS coordinates, routing data, and event-driven updates.

AI-Powered Gmail Classification and Automation — 2025

Technologies: n8n, Google Gemini, Gmail API, Google Sheets, Telegram

- Built an event-driven Gmail workflow that uses Gemini and LangChain to classify incoming emails into categories such as work, promotions, social, and personal.
- Automated email labeling, work-email summarization, promotional-email handling, Google Sheets storage, Telegram notifications, and AI-assisted personal-email replies.

- Integrated Gmail, Gemini, Google Sheets, and Telegram through n8n workflow nodes and API credentials to create an end-to-end automation pipeline.

Cattle Breed Recognition System, Smart India Hackathon — 2025

Technologies: Python, TensorFlow, MobileNetV2, OpenCV, CNN

- Developed a computer vision system for cattle breed classification, including an additional "Unknown" class for non-cattle images, using MobileNetV2 transfer learning, image augmentation, and preprocessing.
- Implemented separate training, evaluation, and prediction workflows with per-class performance reporting.

Achievements and Certifications

- Smart India Hackathon (SIH) 2025: Institutional representative for a cattle breed recognition solution addressing an agricultural identification problem.
- H4CKP13T 0X01 CTF: Participated in a cybersecurity capture-the-flag competition covering cryptography, web exploitation, and reverse engineering challenges.
- Certifications: Git and GitHub (Spoken Tutorial, IIT Bombay, 2025); C++ (Sololearn, 2025); C (Spoken Tutorial, IIT Bombay, 2024)
